SUBJECT: DIGITAL_EDU_FORUM-IV: Emergency Remote Interdisciplinary Science Teaching in the days of Pandemia

The Covid19 pandemia which we are experiencing during 2020 forced all educational institutions to work on the internet. Within a short period of time, methods, techniques, and tools of the in person teaching had to be transformed to serve distance education. The educators, in a huge effort, produced and applied various and numerous educational materials, following the principles of Distance and Adult Education, more or less. Science teachers, in the framework of STEAM Education, had been more adequately prepared than others because of the incorporated support of Technology in the cognitive objects.

In this phase of school works, in the end of the first year of pandemia, it is worth highlighting good practices in Remote Interdisciplinary Science Teaching in order to have them, in the future, as a legacy in school education if it continues to materialized at a distance mode or it will return to the in person, in the post-pandemic era.

We invite you to the DIGITAL_EDU_FORUM-IV: Emergency Remote Interdisciplinary Science Teaching in the days of pandemia, which will be carried out on Monday 14 December 2020, 16.00-20.00 on WeBex platform.

More information will be given to the participants who will declare their desire in the following link https://docs.google.com/forms/d/e/1FAIpQLScOdUP0yMeYoZBez8J42PiK8sCfep8bjB9IiTiwXtaWCwehEQ/vi_ewform

Looking forward to seeing you soon, in person, at Crete in an Experiential live Forum, after lifting of the pandemia restrictions!

Participation is optional.

A duplicate copy shall be kept at the RCED-Crete Secretariat

Internal distribution of the document: Organizational
Coordinator of the RCED-Crete

Honorably

Maria Kalathaki, Med, Ph.D
Coordinator of Secondary Schools'
Educational Work
